System Description:

NEWLINK surface raceways are a one-piece non-metallic, self-adhesive latching raceway approved for indoor use only, over exposed surfaces (no plenum). Aesthetically designed to organize and route UTP cables as well as Fiber Optics from the Telecommunications Room to the Work Area, these raceways can endure numerous open/close cycles without creating discoloration or stress cracks. The one-piece design allows cords to be laid in rather than pulled through, reducing installation time and cost. A special self-adhesive backing makes mounting very easy.

Covers are self-locking, hidden positive latch permits quick re-entry as well as providing a secure installation of premise wire. Accessories are available for the 3/4" and 1 1/4" widths for the common requirements to join, drop, divert, junction, bend, etc. are available in matching colors for a neat professional finish.
